

CITY OF WEST HOLLYWOOD
DEPARTMENT OF PUBLIC WORKS
Engineering and Traffic Survey, October 2016

Fountain Avenue between La Cienega Boulevard and Fairfax Avenue

This engineering and traffic survey (E&TS) was prepared for the segment of Fountain Avenue between La Cienega Boulevard and Fairfax Avenue in accordance with California Vehicle Code (CVC) Section 627, and is required under CVC 40802 if speed limits are to be enforced by radar or any other electronic device that measures the speed of moving objects. CVC 40802 requires speed zones to be evaluated on a recurring basis to avoid being a "speed trap". If the E&TS is more than 5 years old, courts may reject evidence of speeding obtained through radar or other electronic devices. Engineering and traffic surveys may be up to 7 years old if conditions under CVC 40802(c)(1) related to enforcement training and equipment certification have been met.

Fountain Avenue is classified as a collector street in the City of West Hollywood General Plan. The adjacent land use is high-density residential and some commercial land uses. The street has two travel lanes in each direction and parallel on-street parking on both sides of the street.

The posted speed limit is 35 mph based on a 2011 E&TS. Speed data collected on April 6, 2016 revealed the 85th percentile speed to be 38 mph.

CVC 21400(b) requires the local authority to round speed limits to the nearest five miles per hour of the 85th percentile of the free-flowing traffic. However, in cases in which the speed limit needs to be rounded up to the nearest five miles per hour increment of the 85th-percentile speed, the local authority may instead optionally round down the speed limit to the lower five miles per hour increment, but then the local authority shall not reduce the speed limit any further for any reason. This round-down option is described under Option 2 in the California Manual of Uniform Traffic Devices, Section 2B.13 Paragraph 12a. This engineering and traffic survey recommends applying the Option 2 round-down thereby retaining the existing 35 mph speed limit.

Application of the CVC 21400(b) Option 2 round-down precludes further reduction in the speed limit. Nevertheless, the following are provided to fulfill the requirements of CVC 627(b):

- Accident Records: The expected collision rate on a 4-lane or more undivided highway is 3.55 per million vehicle miles (MVM). With 124 collisions recorded over a two-year period and 39,428 average daily traffic, the collision rate has been 4.95 per MVM, which exceeds the expected rate.

- Highway, traffic, and roadside conditions not readily apparent to the driver: No downward speed zoning is recommended based on highway, traffic, and roadside conditions not readily apparent to the driver.

Recommendation

Based on prevailing speeds rounded down per Option 2, the existing posted speed limit of 35 mph should be retained.

Walter Okitsu, P.E.
Registered Traffic Engineer, Calif. TE 1406
