

CITY OF WEST HOLLYWOOD
DEPARTMENT OF PUBLIC WORKS
Engineering and Traffic Survey, October 2016

Fairfax Avenue between Fountain Avenue and Willoughby Avenue

This engineering and traffic survey (E&TS) was prepared for the segment of Fairfax Avenue between Fountain Avenue and Willoughby Avenue in accordance with California Vehicle Code (CVC) Section 627, and is required under CVC 40802 if speed limits are to be enforced by radar or any other electronic device that measures the speed of moving objects. CVC 40802 requires speed zones to be evaluated on a recurring basis to avoid being a “speed trap”. If the E&TS is more than 5 years old, courts may reject evidence of speeding obtained through radar or other electronic devices. Engineering and traffic surveys may be up to 7 years old if conditions under CVC 40802(c)(1) related to enforcement training and equipment certification have been met.

Fairfax Avenue is designated as an arterial in the City of West Hollywood General Plan. The arterial is located in a high-density commercial and residential area with on-street parking on both sides of the street. The segment south of Santa Boulevard has a landscaped median island.

The posted speed limit for Fairfax Avenue is 35 mph based on a 2011 E&TS. Speed data collected on April 5, 2016 revealed the 85th percentile speed to be 40 mph.

CVC 21400(b) requires the local authority to round speed limits to the nearest five miles per hour of the 85th percentile of the free-flowing traffic. However, the local authority may apply Option 1 within MUTCD Section 2B.13 Paragraph 12a which says “The posted speed may be reduced by 5 mph from the nearest 5-mph increment of the 85th percentile speed, in compliance with CVC Sections 627 and 22358.5.” The cited CVC Section 627 says the E&TS must consider the following:

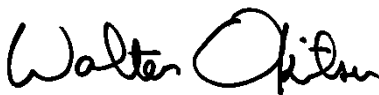

- Accident Records: The expected collision rate on a 4 or more lanes divided highway is 2.30 per million vehicle miles (MVM). With 61 collisions recorded over a two-year period and 33,366 average daily traffic, the collision rate has been 5.01 per MVM, which exceeds the expected rate.

- Highway, traffic, and roadside conditions not readily apparent to the driver: According to CVC 22358.5, “Conditions not readily apparent to the driver” exclude roadway width, curvature, grade, and surface conditions.” No downward speed zoning is recommended based on highway, traffic, and roadside conditions not readily apparent to the driver.

CVC 627 also allows optional consideration of residential density as well as pedestrian and bicycle safety. This segment has buffered bike lanes that merit application of Option 1’s five mile per hour reduction.

Recommendation

Based on prevailing speeds reduced by 5 mph with an Option 1 reduction due to the accident rate and presence of buffered bike lanes, the existing posted speed limit of 35 mph should be retained.

Walter Okitsu, P.E.

Registered Traffic Engineer, Calif. TE 1406
