

STRAWS UPON REQUEST

City of West Hollywood
California 1984

City of West Hollywood
“Straws Upon Request”
Education Campaign

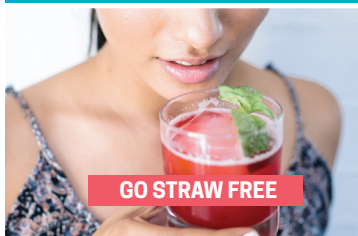

Did you know U.S. consumers use an estimated 20 billion plastic straws annually? **Many of the plastic straws used in Southern California end up in the ocean.** What's the best way to keep plastic straws out of the ocean?

Don't use one.

The City of West Hollywood is dedicated to sustainability and preserving our environment. As a City with over 200 restaurants, bars and nightclubs – West Hollywood can make a difference. The City of West Hollywood encourages dine-in and drink-in businesses to provide plastic straws to customers upon request. We encourage you to do your part and Go Green!

No plastic straw? No problem.

Check out the alternatives below.
